

exgarde options

exgarde PRO Access Management PC software provides the flexibility needed through easy-to-understand expansion options. These additional features gives **exgarde** PRO the ability to integrate with equipment from leading CCTV or biometric reader manufacturers. **exgarde** PRO expansion options allow you to tailor the software to your exact requirements.

Overview of **exgarde** expansion options

Features

- Expansion options cover a wide range of industry leading equipment
- Support for industry leading Digital Video Recorder (DVR) manufacturers such as Baxall, Dedicated Micros, Panasonic, Vista
- Comprehensive integration pack for connection to third-party software and database applications using **EXFUSION** and Microsoft® OPC server
- Support for biometric technologies such as iris, finger print and vein pattern recognition
- **EXTOUR** application provides confirmation that a guard tour is being completed in the allotted time
- **EXVISITOR** Visitor Management front-end allows the effective management of personnel visiting the site
- **EXNOTIFY** forwards pre-selected events to SMS, e-mail or pocket PC running a Pocket Notifier application using Wi-Fi

Benefits

- Tailor the software to match your precise requirements
- View live camera feeds from within **exgarde** PRO. Tag access events to facilitate rapid searching of footage
- Connect to third-party databases using these tools. Allows the automatic population of card holder details and events into other systems including time and attendance
- Enrol users and distribute templates from within **exgarde** PRO. Removes the need to run multiple applications.
- Utilise readers within the existing TDSi access control system to manage the tours of security guards.
- Efficiently manage the scheduling and booking of visitors to site through an simple-to-use, intuitive module.
- Provides a means of viewing selected access events and alarms while mobile.
